2. New Features and Enhancements

2.1 Applicable INSIGHT Connect App

- **Unified Language Support Across Platforms**: All platforms now support 13 languages, ensuring a consistent and localized user experience across devices. Refer to section 4 to view list of supported languages
- **IR Tool Help Section in About Screen**: Added a dedicated IR Tool Help section in the About screen to provide quick access to product guidance and reference information.
- **Support for Latest Mobile OS Versions**: Added compatibility with Android 16 and iOS 26, ensuring continued reliability and performance on the latest operating systems.
- **Minimum Supported Android Version Update**: Updated the minimum supported version to Android 10
- **Displayed App Version on Menu Screen**: The application version is now displayed on the menu screen to simplify version identification for users and service teams.

2.2 Applicable QX WiFi 4.0 and QX WiFi 6.0

- **Manual Tool Calibration with Controller Pairing**: Enabled manual calibration of tools even when paired with a controller, allowing greater flexibility in calibration management.
- **Auto-Hide for Current Plausibility Parameters**: Current Plausibility (CP) parameters are now automatically hidden when CP is disabled, simplifying configuration and improving usability.
- **Delay Step Introduced in QX PSET**: Added the Delay Step option in QX PSET configuration to provide enhanced control over tightening sequences
- **Regional Support for Wi-Fi Tools:** Added regional support to ensure regulatory compliance and improved wireless connectivity.

3. Issue Fixes

- **Wi-Fi Settings Read/Save Issue Fix**: Fixed an issue where Wi-Fi settings could not be read or saved on QX Wi-Fi 4 tools, ensuring reliable configuration management.

4. Language Support
