

MEASUREMENT SOLUTIONS

BEST-IN-CLASS INSTRUMENTATION

ABB offers highly accurate, reliable, safety-certified smart measuring devices and asset performance tools enabling safe and efficient operations along the entire industry value chain.

THE ABB INSTRUMENTATION PORTFOLIO

- Flow measurement
- Pressure measurement
- Temperature measurement
- Level measurement
- Damper drives/actuators
- Valve Positioners
- Flow meter verification
- Service

ABB & MCE - A GREAT PARTNERSHIP

- Significant inventory ready-to-ship
- In-house seal assembly
- Easily configurable with universal interface
- My Measurement Assistant providing product data at your fingertips

Featured Products

DIGITAL DIAPHRAGM SEAL (DDS)

- Superior product engineering provides quicker response time
- Minimized temperature effect impacts for higher accuracy
- Increase data availability for monitoring (both pressures via HART)

NON-INVASIVE TEMPERATURE SENSOR (NINVA)

- **Safer:** No process penetration, no threat of undetected welding defects
- **Simpler:** Single device for all piping diameters providing a fast and accurate measurement point
- **Lower Cost of Ownership:** No need for turnaround checks
- **High Performance:** Using time-tested and proven sensors

BAILEY DAMPER DRIVE

- ABB offers pneumatic (Bailey) and electric (Contrac) damper drives
- Upgrade your Bailey Damper Drive to get better accuracy and increase efficiency
- Reduce fuel costs and emissions saving you \$100,000's per year
