

AUTHORIZED US NAVY SUPPLIER

- Registered under Cage Codes 1H855 and 6F024.
- Comprehensive solutions engineered for shipboard applications.
- Complete project management / engineering for ShipAlt and MachAlt projects.
- Wide variety of instrumentation and valving approved to Mil Spec Mil-S-901D Grade A and Mil-STD-167-1.
- Successful shipboard engineering solutions within steam machinery, chilled water, bleed air, refrigeration HVAC, and life safety.

As a trusted vendor partner, Ives Equipment provides the US Navy:

- Manual ball valves ¼” through 3”
- Directional 3-way Valves
- Pneumatic and electric control valves 1” through 2”
- Flowmeters ½” through 12”
- Solenoid valves all sizes
- Dual temperature elements
- Pressure transmitters
- Temperature transmitters
- Level transmitters
- RTD assemblies

Products supplied by Ives Equipment meet the following United States Military Standards:

- Mil-Spec qualified high shock MIL-901D
- MIL-STD-167 valves
- MIL-STD-167 flow meters
- MIL-SPEC Pneumatic and electric control valves

- Level Transmitters

- Solenoid Valves
- Air, Gas, Water, Oil, and Steam Flow Control

- Ball Valves
- Available Materials: Nickel Aluminum Bronze (NAB), Monel, and Titanium

- Flow Meters

- RTD's
- Dual Element Sensors

- Linear Control Valves

- Pressure Transmitters
- Differential Pressure Transmitters

- Pressure Transducers
- Pressure Gauges (Wallace & Tiernan)
